

ANGE KOUMBA

Full-Stack Developer & Data Scientist

Kigali, Rwanda | +250 737 680 403 | angekoumba754@gmail.com

linkedin.com/in/ange-koumba | github.com/Kay1403

PROFESSIONAL SUMMARY

Versatile Full-Stack Developer and Data Scientist with a Bachelor's degree in Information Technology and advanced certifications from ALX Africa. Specialized in building highly secure, scalable web applications (Next.js, Django, NestJS) and developing data-driven predictive models to solve real-world business challenges. Proven track record in optimizing application performance by up to 40% and designing granular security architectures (2FA, RBAC). Strongly passionate about driving innovation at the intersection of Fintech and Artificial Intelligence. Immediately available.

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, Next.js (App Router), Tailwind CSS, JavaScript (ES6+), HTML5/CSS3, Redux, Zustand
- **Backend & APIs:** Python, Django, Django REST Framework, Node.js, NestJS, REST APIs, JWT, WebSockets
- **Data Science & ML:** Python (Pandas, NumPy, Scikit-learn, XGBoost, Prophet), Machine Learning, Predictive Modeling, Data Visualization (Matplotlib, Seaborn)
- **Databases & Storage:** PostgreSQL, MySQL, MongoDB, Supabase, Prisma ORM, Query Optimization
- **DevOps & Tools:** Git/GitHub, Docker, Linux (Bash), CI/CD, Netlify, Vercel, Postman
- **Languages:** French (Native), English (Fluent), Kinyarwanda (Basic), Spanish (Basic)

PROFESSIONAL EXPERIENCE

Full Stack Developer | Saltel – Kigali, Rwanda

January 2025 – March 2026

- **UI/UX Modernization:** Designed and implemented responsive, type-safe interfaces using React and TypeScript, increasing user engagement and interface usability by 30%.
- **Performance Engineering:** Refactored legacy frontend components, reducing initial application load times by 40% through code splitting, image optimization, and lazy loading.
- **Quality Assurance:** Developed robust unit and integration tests in an Agile environment,

significantly reducing production bugs and improving long-term system maintainability.

- **Agile Collaboration:** Actively participated in sprint planning, daily stand-ups, and peer code reviews, ensuring the consistent and on-time delivery of complex product features.

Full Stack Developer (Freelance & Self-Employed) | Kigali, Rwanda

January 2026 – Present

- **SaaS Architecture:** Architected and engineered **ENTRESAAS**, a modular enterprise platform featuring over 50 secure REST API endpoints with NestJS and React.
- **Security Implementation:** Integrated advanced security protocols including multi-factor authentication (2FA via TOTP), Role-Based Access Control (RBAC), and secure JWT management.
- **Product Facilitation:** Developed **GabSpot**, a specialized community commercial visibility platform utilizing Next.js, TypeScript, and Supabase (Auth, Realtime, Database, and Storage) to optimize local product discovery.
- **Deployment Automation:** Set up automated CI/CD pipelines using GitHub, Vercel, and Netlify, ensuring seamless zero-downtime updates for production clients.

KEY PROJECTS

Credit Risk Analytics System | Python, Scikit-learn, Pandas, PostgreSQL, XGBoost

- Built an end-to-end machine learning platform that evaluates customer creditworthiness to support financial loan approval decisions.
- Implemented rigorous feature engineering on complex financial datasets, training predictive models to assess client solvency with an **85% accuracy rate**.

BornSafe | Django, PostgreSQL, Python, QR Code API

- Developed a digital transformation platform for municipal civil registries to modernize birth certificate management.
- Integrated secure automated PDF generation and unique QR code verification systems to eliminate certificate forgery and ease local administrative validation.

SAWAI (Smart Agriculture With AI) | Python, IoT, Arduino, Data Visualization

- Co-designed an IoT-based soil monitoring system that collects real-time environmental metrics (pH, humidity, temperature).
- Developed a predictive irrigation model using historical data analysis, increasing agricultural resource management efficiency by **25%**.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology

University of Kigali (2022 – 2025)

- **Thesis:** "Blockchain and Transaction Security: A Revolution for Finance?"

- **Leadership:** Selected as Class Representative, managing communications and academic problem-solving for a cohort of 50+ students.

Professional Specialization Certifications

ALX Africa (2024 – 2026)

- **Technical tracks completed:** Backend Web Development (Python/Django), Frontend Web Development (React/TS), Data Analytics, and Python Automation.
- **Business tracks completed:** Founder Academy & Freelancer Academy.
- **Honors:** Graduated as a top-tier performer with **3,370+ Legacy Points**.

Specialized Intensive Training

- **The Gym Rwanda:** Intensive Software Engineering & Career Acceleration Program (2025).
- **WorldQuant University:** Applied AI Laboratory Cohort Selection (2024).

HONORS & INTERESTS

- **Awards:** Interdepartmental Football Champion (2025) – Demonstrated teamwork, strategic execution, and performance under pressure.
- **Interests:** Sports Analytics (Formula 1 & Football data trends), Generative AI developments, and Cybersecurity architectures.
