Portfolio: kay1403.github.io/portfolioofficial

PROFESSIONAL SUMMARY

Dynamic Full-Stack Developer and Data Scientist focused on the intersection of Fintech and Artificial Intelligence. Graduated from ALX Africa and the University of Kigali, I design robust web architectures (Django/React) and develop predictive models to solve complex business problems. Recognized for rapid learning and delivering innovative solutions in high-pressure environments like The Gym Rwanda and WorldQuant AI Lab. **Immediately available.**

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, Next.js, Tailwind CSS, JavaScript (ES6+), HTML5/CSS3
- **Backend:** Python, Django, Django REST Framework, Node.js, REST APIs, JWT
- **Data Science:** Pandas, NumPy, Scikit-learn, Machine Learning, Data Visualization
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools:** Git/GitHub, Docker (basics), Linux (Bash), Swagger, Postman
- **Languages:** French (Native), English (Fluent/Professional), Kinyarwanda & Spanish (Basics)

WORK EXPERIENCE

Front-End Developer | Saltel, Kigali

January 2025 – March 2026

- **UI Development:** Designed responsive interfaces for internal applications using React and TypeScript, improving user experience by 30%.
- **Optimization:** Refactored legacy components, reducing load times by 40% through lazy loading and code splitting.
- **Collaboration:** Active participation in code reviews and Agile ceremonies, ensuring on-time sprint deliveries.

KEY PROJECTS

SAWAI - Smart Agriculture With AI | Python, IoT, Data Viz

- IoT-based soil monitoring system collecting pH, humidity, and temperature data.
- Developed a predictive model for irrigation, optimizing agricultural resource management.

Library Management System | Django, DRF, PostgreSQL, JWT

- Complete REST API architecture with secure JWT authentication and automated tracking workflows.
- Interactive documentation generated with Swagger for seamless frontend integration.

Credit Scoring Model | Python, Scikit-learn, Pandas

- Machine learning model predicting client solvency with 85% accuracy.
- Implemented feature engineering on financial data to mitigate default risks.

BornSafe - Birth Certificate Management | Django, QR Code, PDF

- Digitalization platform for Gabonese municipalities featuring automated QR code generation and authenticated PDF verification.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology

University of Kigali (2022 – 2025)

- Thesis: "Blockchain and Transaction Security: A Revolution for Finance?"

ALX Africa – Professional Certifications (2024 – 2025)

- **Technical Specializations:**
 - **Backend Web Development:** Python, Django, API Design (Validated - 69.4%).
 - **Frontend Web Development:** React.js, TypeScript (Validated - 79.53%).
 - **Data Analytics & Data Science:** Applied Machine Learning & Statistical Analysis.
 - **Python Programming:** Advanced Scripting and Automation.
- **Professional & Entrepreneurial:**
 - **Freelancer Academy:** Business management for independent developers.
 - **Founder Academy:** Startup fundamentals and venture building.
 - **Professional Foundations:** Soft skills, leadership, and workplace excellence.
- **Ongoing Training:** Cybersecurity & Advanced Machine Learning.
- **Distinction:** Earned **3,370 Legacy Points** (Top Tier Performer).

Specialized Training

- **The Gym Rwanda:** Intensive Software Engineering Program (2025).
- **WorldQuant University:** Applied AI Lab (2024).

ACHIEVEMENTS & LEADERSHIP

- **Leadership:** Class Representative at University of Kigali (2023 – Present) – Liaison for 50+ students.
- **Teamwork:** Interdepartmental Football Champion 2025 (Strategic performance under pressure).

INTERESTS

- **Technology:** Generative AI, Blockchain, and Cybersecurity trends.
- **Strategy:** Sports analysis (F1 & Football) and global cultural dynamics.
